

- Mockup A
 - More contrast between sidebar text and background
 - Consider using white for all the text?
 - Good variety of images
- Add intro text (like first one or two paragraphs from Wikipedia page) to home screen
- Overall different categories (plot, voice cast, production, reception) are organized nicely and easy to navigate to for both mockups
- Maybe have less images on home page and incorporate them into the other pages if you do add intro text to home page
 - Contentwise I think Wikipedia should have everything for the different pages
 - Maybe for voice cast use pictures of the voice actors if they're available?
